Al Warqa-Warqa

ETA Dewa-Ras Al Khour

Tecom Road

Automatic Irrigation

Al barsha- Dubai Hospital

Time Electro- Zabeel

An automated irrigation system refers to the operation of the system with no or just a minimum of manual intervention beside the surveillance. Almost every system (drip, sprinkler, surface) can be automated with help of timers, sensors or computers or mechanical appliances. It makes the irrigation process more efficient and workers can concentrate on other important farming tasks.

On the other hand, such a system can be expensive and very complex in its design and may need experts to plan and implement it. Water is the crucial element required for the sustenance of every beautiful landscape.

Dry Docks

Eco Green Dubai specializes in the design and installation of automatic irrigation systems that will ensure the regular and accurate provision of water to your landscape. We employ the latest irrigation technology that is installed and commissioned by experts to help preserve your landscape's natural radiance and beauty.

Advantages

- Automation eliminates the manual operation of opening or closing valves
- Possibility to change frequency of irrigation and fertilization processes and to optimize these processes
- Adoption of advanced crop systems and new technologies, especially new crop systems that are complex and difficult to operate manually
- Use of water from different sources and increased efficiency in water and fertilizer use
- System can be operated at night, water loss from evaporation is thus minimized
- Irrigation process starts and stops exactly when required, thus optimizing energy requirements

Water Features

The sound of running water can be very soothing. The expense and upkeep of a pond with a waterfall can be high. Maybe you just don't have much room to work with. Garden water features or fountains can be a great alternative to your garden landscape plan.

Eco green undertakes the engineering design and construction of decorative water features such as cascades, streams, lakes and fountains that will serve to accentuate the beauty of your landscape. In addition to water features, Eco green Dubai also specializes in the construction of customized swimming pools that comply with international standards.

In landscape architecture and garden planning, Water features refer to fountains, pools, ponds, streams, waterfalls and cascades. These uplift the beauty and smartness of a normal swimming pool. It adds a sense of class to the pool. Enhancement water features are included in our swimming pool design as per the tastes, requirements and the budget of our clients.

We have qualified engineers who are skilled in the field of water features and will provide you with customized water features and swimming pools that are best suited to your requirements.

Wooden Structure Works

Mushrif Park

Mushrif Park

Al Mankhool Park

Timber structures serve to satisfy functional requirements such as decking, shade and seating whilst providing your landscape with an aesthetic appeal.

Eco green caters to the engineering design and construction of a wide range of engineered timber structures including fences, railings, decking, pergolas, arbors and climbing frames. All materials used are of the highest quality and have been treated to ensure stability and durability. We ensure our timber structures can be enjoyed by all for many years to come. Engineered timber elements are used in the today's fast growing methods of modern

constructions. In many building projects, engineered timber elements are used which are environmentally sensitive, easy to use and cost-effective. These elements are specifically engineered to fix up the specific designing from industrial products to home construction and commercial buildings.

We construct a wide variety of engineered timber elements that are made from lumber, veneers, and strands of wood. These elements are then bound together with structural resins forming the lumber-like structural goods. By using our engineered timber elements, you will get many environmental benefits throughout the completion of the construction process.

Landscape Lightings

Landscape lighting systems are provided to illuminate and enhance the beauty of the landscape in the night. Eco green specializes in the implementation of dynamic and efficient lighting systems that will enliven your landscape into an area of spectacular beauty.

A variety of lights can be used to accentuate trees and highlight features such as swimming pools, fountains, gazebos, patios, and plants. Eco green uses the latest technology to implement landscape lighting systems of the highest quality that will best complement the beauty of your landscape.

QA/QC Policy Statement

Eco green's philosophy is to continuously strive for excellence in delivering professional services.

This commitment to quality service mandates the use of a formal quality management organizational structure that sets minimum quality standards required to meet our Client's needs and expectations for quality, timeliness, cost-effectiveness and efficiency. Eco green has established project and communication processes that ensure accurate, timely and effective response to the identified needs of our Clients.

Eco green's approach includes the following:

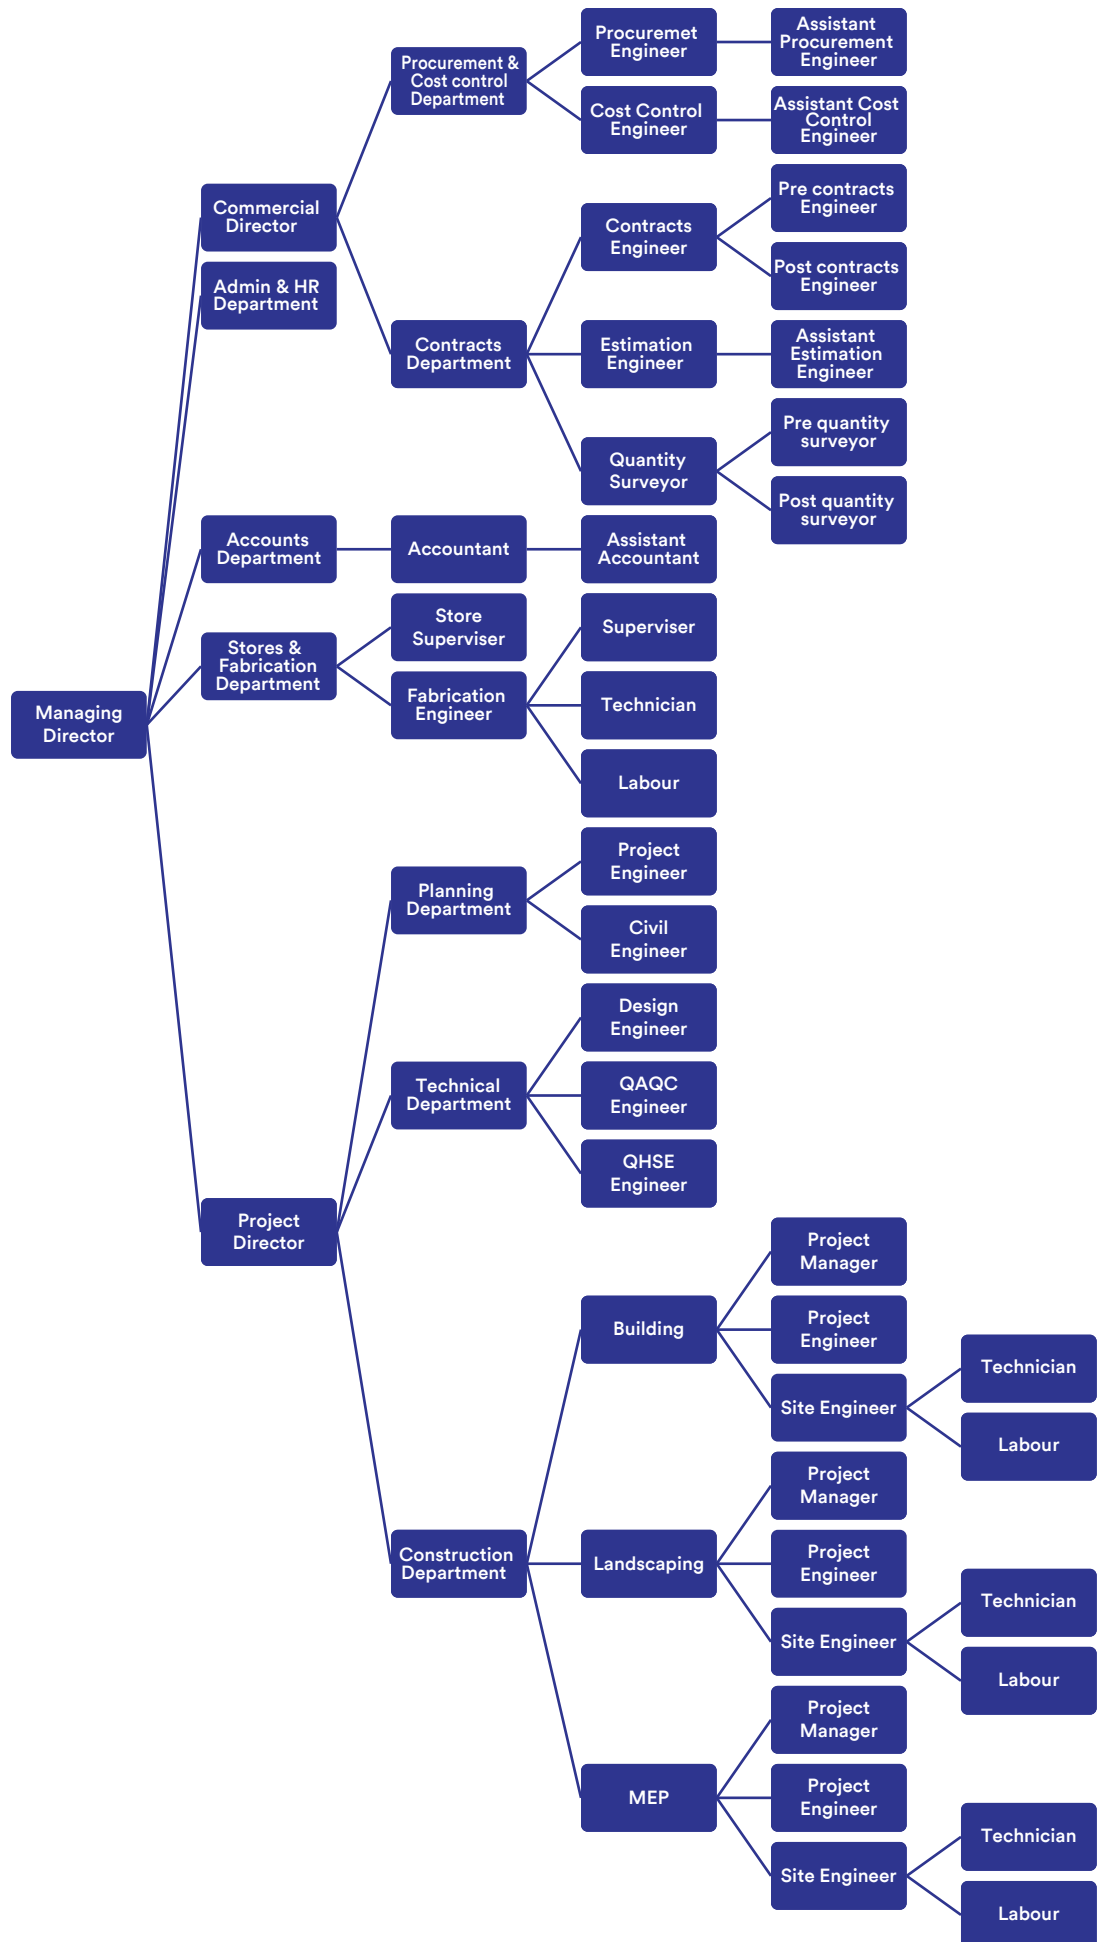

- A single point of contact to address all technical issues - this structure holds constant regardless of the project location;
- A uniform format for project completion and report preparation regardless of which office (or site office) is taking the lead;
- All work is managed through Eco green Contracting & Landscaping LLC Projects Director based in our head offices;
- A set company-wide QA/QC Policy.

Assessment of Percentage of Time for Quality Control is developed from similar projects assuring accuracy, compliance and thoroughness. The size of the contract, the technical complexity and the regulatory and design requirements being addressed determines the level of QA/QC activities. Competent and experienced Quality Control Manager(s) support Eco green's QA/QC program and provide overall Quality Review to assure

- Tasks are completed with the highest degree of technical accuracy.
- Investigations, assessments, and recommendations are competently developed and conducted.
- Final documentation is in concert with our Clients', as well as applicable regulatory authority, requirements.
- We decided long ago that what we do for our clients must exceed the standard and quality of work that any other best company in industry can offer and deliver.
